PINNACLE INSTANT VideoAlbum

No Experience Required!

Transfer all your home videos from your camcorder or VCR to long-lasting Video CDs or DVDs.

Only Pinnacle Instant VideoAlbum has been specifically designed to deliver high quality results while making the process easy, safe and fast.

Anyone can do it!

Save and Preserve Your Memories Forever

"I recently purchased a DVD player which looks great, but I still have to keep my VCR around just to play my old tapes."

Pinnacle Instant VideoAlbum lets you quickly and easily convert your entire videotape collection to video CDs or DVDs that can be watched on almost any DVD player.

- Automatic burning from videotape direct to the disc - simply press the button and go.
- Create custom video scrapbooks with DVD-style menus and burn them to video CD or DVD.
- Automatic video Clean-up feature to restore video quality from older tapes.

Share Your Memories With Friends and Family

"I have shoeboxes full of VHS tapes that we never watch. It takes too long to dig through them trying to find the part I want to show"

With Pinnacle Instant VideoAlbum you can create great CDs and DVDs with menus and chapters, for convenient cataloguing and fast navigation

- Automatic Music Video instantly creates a movie that changes in time to the beat of your favourite tune in the background.
- Create slideshows automatically by adding digital still photos into your project
- Print automatically generated CD and DVD artwork, or create your own customised labels

Improve and Enhance Your Videos

"I'm not a pro when shooting my videos... While watching them later, I'd like to fix the few shooting mistakes or out the long, boring parts."

With Pinnacle Instant VideoAlbum, your original footage can be easily enhanced.

- Automatic Scene Detection feature splits the video in multiple sequences - making it easier for you to keep the good parts and shorten or delete the others.
- Use Automatic Colour Correction and Brightness Adjustment to make your movie look better than ever
- Use Automatic Image Stabilization to correct shaky shots

Great for Camcorders

- Capture video from DV camcorders
- Automatic Music Video feature creates custom movies that change to the beat
- Burn directly to CD or DVD at capture time for quick and easy disc creation
- Automatic Scene Detection
- Create chapters for easy menu set up
- Image Stabilization to correct shaky video
- Automatic Colour Correction makes for better looking video
- Brightness Adjustment to correct dark shots
- Keep the best parts of the video with easy scene splitting and trimming

Burn Great Looking CDs and DVDs

- Create Video CDs or DVDs that play on your set-top DVD player
- Custom Menu Creator using hundreds of buttons, layouts, text styles, backgrounds and audio tracks included - or add your own!
- Includes Hollywood-style motion menus with video playing in the background of your menu
- Preview your project at any time with Instant VideoAlbum's real-time preview window
- Automatically create labels and inserts for your DVD case

Also Works with Digital Cameras

- Import video clips and still images from your scanner, Smart Card, CD, or hard drive.
- Create interactive slideshows with all your digital photos.
- Crop, rotate, flip, or change the brightness, contrast and colour of your photos.
