

# discreet® cleaner™ 6

cleaner's adaptive noise reduction filter produces razor-sharp video

## WEB

Latest and greatest QuickTime® with MPEG-4 and AAC compression

## DVD

Faster-than-ever MPEG with 2-pass variable bit rate encoding

## PDA

Cutting-edge Kinoma™ video formats for handheld PDAs

## The essential video encoder

Discreet® cleaner™ 6 for the Apple® Macintosh® computer is the industry standard for professional video encoding and the indispensable complement to Apple® Final Cut Pro®, Adobe® Premiere® and Avid® Xpress® DV. With cleaner software, video editors are only a click away from delivering the highest quality video output – every time.

## Flexibility

cleaner supports more video formats than any other product on the market. You can now deliver results in the formats you need such as Apple QuickTime 6, MPEG-4, even Kinoma™ for handheld PDAs.

## Quality

cleaner produces the highest quality output. With cleaner software, you will find that many of our filters now process in native YUV to help maintain source fidelity. We include features for high quality output in the most important playback environments such as the Internet and DVD.

## Productivity

cleaner helps deliver more in less time. Using new, advanced features, including drag-and-drop encoding, it's easy to compress files directly from your editing station. Add stream navigation, synchronize HTML to streaming media, embed links and interactive hot spots to truly engage your audience.

## Speed

cleaner is optimized for the Mac® OS X operating system with new Aqua® user interface enhancements. The software offers blazing performance gains, taking full advantage of the G4 Velocity Engine™ and dual processor configurations.

## Integration

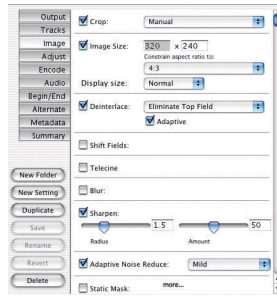

cleaner integrates with all of your favorite web design tools, such as Macromedia Flash™, Macromedia® Dreamweaver® and Adobe® GoLive®. And it works seamlessly with Final Cut Pro, Adobe Premiere and Avid editing systems.

### Supported input formats

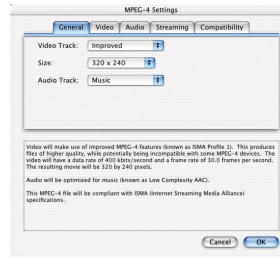

DV, QuickTime (with MPEG-4 and AAC support), Video for Windows® (AVI), MPEG-1, MPEG-2, MPEG-4, MPEG Layer I Audio, MPEG Layer II Audio, AIFF/AIFC, AU, Sound Designer II, WAV, OpenDML, Macromedia Flash, and other video, audio, animation and still-image formats

### Supported output formats

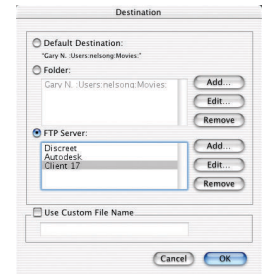

QuickTime (with MPEG-4 and AAC support), RealMedia™ (OS 9 only), Windows Media™, MPEG-1, MPEG-2, Kinoma, MP3, DV, MPEG Layer I Audio, MPEG Layer II Audio, Video for Windows (AVI), AIFF/AIFC, WAV and other video, audio, animation and still-image formats

**FILTER**  
Configure powerful filters to maximize output quality.

**COMPRESS**  
Deliver the latest and greatest formats.

**PUBLISH**  
Publish to the network or directly to a server.

**Features**

- *New:* QuickTime 6, with MPEG-4 and AAC
- *New:* High definition input support
- *New:* Fast MPEG encoding engine for CDs and DVDs
- *New:* Kinoma video formats for PDAs
- *New:* 150 professional encoding settings
- *New:* Drag-and-drop for instant encoding
- *New:* Direct and automated encoding from your editing tool
- *New:* Optimized for G4 Velocity Engine
- *New:* Aqua interface for Mac OS X
- *New:* A/B setting preview mode
- *Improved:* Faster processing and quality for native YUV sources
- *Improved:* Faster YUV filtering chain performance
- *Improved:* Dual processor support
- *Improved:* Custom settings creation and management
- *Improved:* Remove 3:2 pull-down with enhanced intelecine filter
- Import video files from any editing tool
- Compress to QuickTime, RealMedia (OS 9 only), Windows Media, MPEG-1, MPEG-2, MP3 and many more
- Adaptive noise reduction for sharper compressed video
- De-interlace through top/bottom field removal and blend filters
- Crop, scale and enhance video appearance
- Dynamic preview slider for in-frame comparison
- Automated batch encoding for hundreds of video files
- AppleScript support for custom workflow configuration
- Audio sweetening through dynamic range, normalize and reverb filters
- Audio repair through high pass, low pass, noise gating, noise removal and notch filters
- Author interactive video through simple interface
- Seamless publishing to video servers

**Minimum system requirements**

- Apple Macintosh computer with PowerPC® G3 or faster processor (recommended: G4 or G4 dual processor)
- Mac OS 9.1 or higher and Mac OS X v10.1 or higher
- QuickTime 5 or higher
- 128 MB of RAM (recommended: 256 MB of RAM)
- Display card supporting 1024x768 resolution and 16-bit color (recommended: 24-bit color)
- CD-ROM drive
- 20 MB of available hard drive space
